

Design

Designs are for a purpose and usually come from a problem that needs a solution which has not been discovered yet. Your design needs to be purposeful and offer a solution to a problem.

Painting

Using a previous drawing, you can alter the scale to create a zoomed-in version of the original work.

Using the paintbrush in different ways effects the finish of the paint.

How Artists Work

Artists sometimes draw from what they observe and see. However, some artists like to use their imagination to explore answers to unusual questions.

Artists often sketch their ideas down quickly, adding detail later in the process.

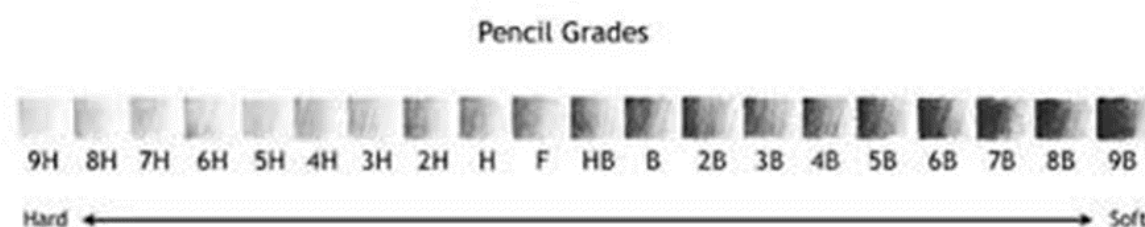

Drawing

Using tone to create textures
Different types of pencils can impact the thickness and quality of a line.

Collage Drawing
After creating a collage, a collage drawing is when you use the collage created to sketch a copy of the creation, adding detail and appropriate colours.

Continuous Line
A continuous line means that you are not taking the pencil from the paper as you draw.

A HB pencil is harder than a 2B pencil.
